Gaggle Safety Management User Guide / Learn the Basics   • • •

What Microsoft services are reviewed by Gaggle?

Created by Corey Tutewiler
Last updated Jul 20, 2016

The Microsoft services that can be reviewed include all inbound and outbound email communications, communications on Yammer as well as files stored in Microsoft OneDrive, such as: Office Documents, Open Office Documents, any text based documents and any picture file formats. Gaggle's content analysis isolates content based on language and images, and Safety Representatives review it to determine whether it's inappropriate.

 Which Microsoft services are reviewed for your school or district will depend upon your service contact.
